

DELIVERABLES FOR PHASE I:

All the steps regarding phase-1 are followed and following are the screenshots.

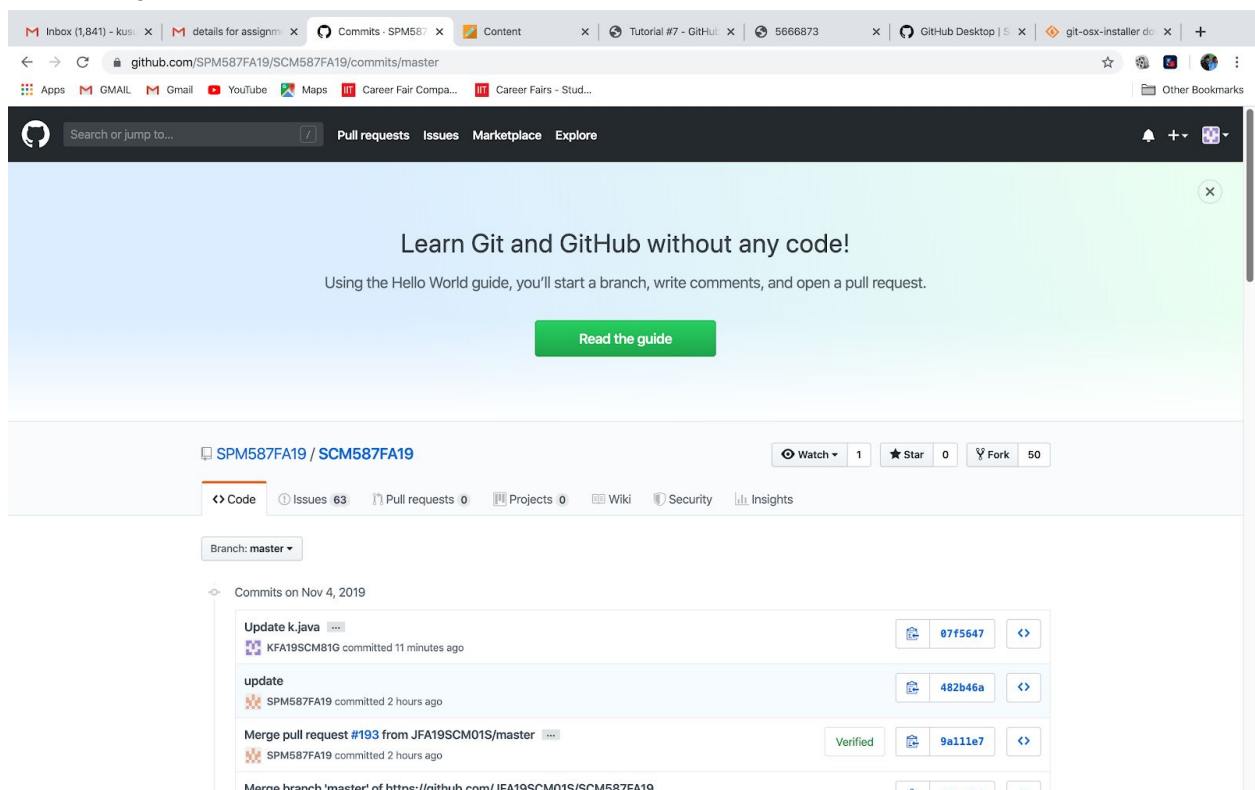

Account ID : KFA19SCM81G

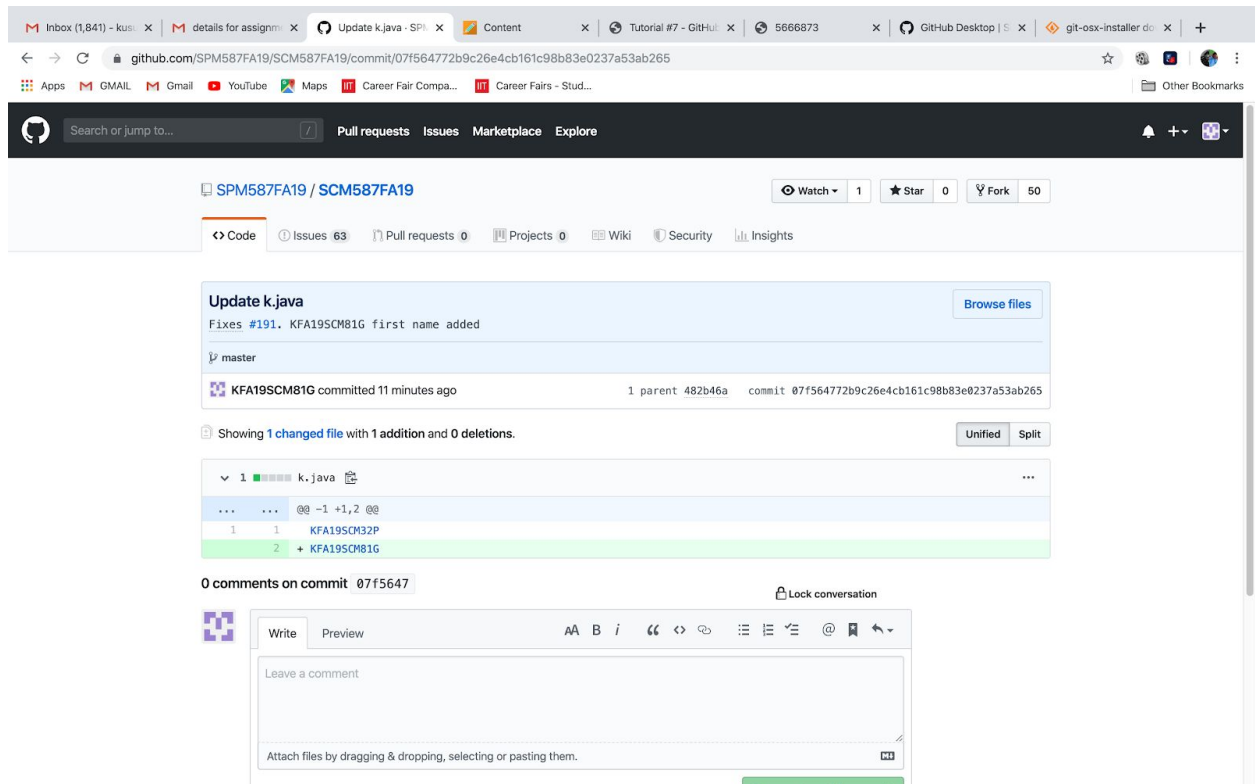

Issue created #191

With the following labels

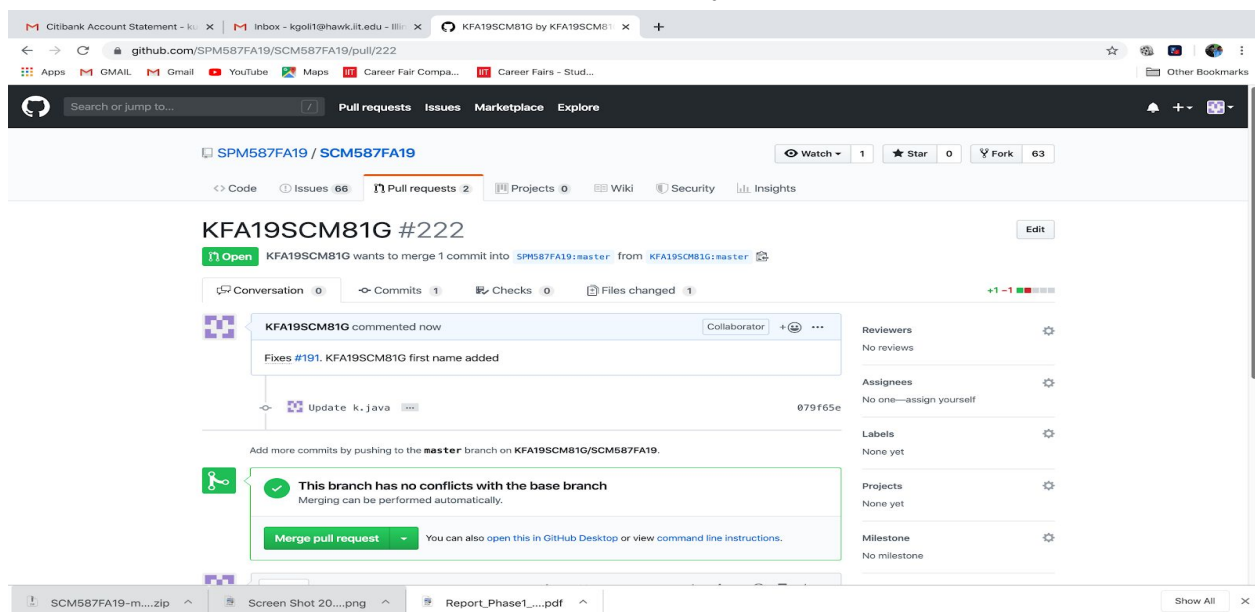

The file k.java is updated with account id

The changes made into file are pushed to origin and committed with the commit message
Fixes #191. KFA19SCM81G first name added

Then a pull request (#222) is made to master repository.

The pull request is been merged by the master.

The screenshot shows a GitHub pull request interface. At the top, the repository is identified as SPM587FA19 / SCM587FA19. The pull request is titled KFA19SCM81G #222 and is in a 'Merged' state. The commit message is 'Fixes #191. KFA19SCM81G first name added' with a commit hash of 079f65e. The pull request was closed 3 days ago. The interface includes tabs for Conversation, Commits, Checks, and Files changed. A sidebar on the right shows settings for Reviewers, Assignees, Labels, Projects, Milestone, and Notifications. The bottom section shows a 'Pull request closed' message and a 'Fork settings' button.

Hence the issue raised has been fixed by updating the file and it is closed. Thus, the **phase I has been completed.**
